

FR500C

It's a race-proven entry, and has the 2005 Grand Am Championship Trophy to prove it!

In its first year of competition, the Mustang FR500C was driven to win the 2005 Grand Am Cup Championship. With a series-high five victories that included a win in its race debut at Daytona in February, the FR500C put the competition on notice. And again in January 2007, the FR500C convincingly won at Daytona, placing 1st & 2nd and having 5 Mustangs finish in the top 11.

The Ford Racing Mustang FR500C was developed by Ford Racing Technology and is available through Ford Racing Performance Parts as a complete turn-key, race-ready package for the Grand-Am Cup Series. All FR500Cs are built to the same specifications and painted white (with NO stripes).

Want to go racing like those pictured above?

Please contact your favorite Ford Racing Performance Parts dealer and order the M-FR500-C today.

Production is Limited for 2007
